Safety Message
10/19/01

Major Hazards:
Crane Operations
Demolition Operations
Biological Hazards
Falling Glass & Debris
Traffic
Walking and Working Surfaces
Hazardous Materials
Lack of PPE
Dust and Airborne Particles

✨ Personal Protective Equipment
Improvement can be seen on the site. Keep up the good work. Using PPE is a positive step in protecting yourself from harm. Set the example for everyone else. The injury you prevent may be your own.

✨ Fuel and Compressed Gasses
Designated areas have been established for the storage of fuel and compressed gasses. Use them and ensure that all containers are approved for use in the confines of the City of New York. Ensure there is adequate separation between fuel containers and compressed gas cylinders. Remove all used or empty containers from the site. Post “NO SMOKING” signs.

✨ Be Aware Of Your Surroundings
Pay attention to what is going on around you, especially when you are working around heavy equipment. Give it plenty of room to work. If you don’t know the plan or what is happening...ASK.

✨ Use Caution When Driving
Do not exceed the maximum 10 mph speed limit when in the work area. Gators must be especially cautious when driving around large equipment or trucks, and always give them the right of way. The area is getting extremely congested.
